June 24, 2009

The Master's Roofing & Construction Contractors (TMRCC) has completed two quality home improvements for us during the past two years. Their professionalism, attention to detail, and willingness to talk/walk us through the entire construction process allows my wife and I to recommend this outstanding company for any home remodeling or repair project. It is also why we will continue to use Mr. Mancias and his highly capable, high quality team.

Jimmy Mancias and his team built a beautiful 375 sq ft cedar patio two summers ago. His design involved cutting into our home to remove an 8-foot section of siding—to say the least my wife and I were concerned. However when the project was completed we received a one-of-a-kind patio with incredible quality. This project also involved us picking out the two trees that would be used as the main support beams of the patio. To say the very least—it was really cool picking out the two cedar trees, a.k.a. support poles, which would become the center piece of our backyard!!

Jimmy's team also replaced our hail-damaged roof this summer. His team was respectful of our property, friendly during the construction, and did not hesitate to ask us questions when needed. They made sure there was no disruption to our normal day and did a great job after completion. Our yard was free of debris and extra attention was given to the removal of nails.

We will gladly answer any requests for further information.

Sincerely,
